Aeronautical Safety College

Iwanuma Training Center Course

While the main campus of the Aeronautical Safety College (Osaka) provides basic training in air navigation services duties for new recruits, the Iwanuma Training Center provides advanced training for personnel such as aeronautical safety personnel, such as air traffic controllers and air traffic safety electronics personnel who are already assigned to the Area Control Center and airport offices and engaged in air navigation duties. This training is intended to improve their specialized knowledge and skills required to acquire technical qualifications, as well as their ability to respond appropriately to any situation that may arise in the field.

Participants will have the opportunity to observe equipment equivalent to what is used in actual operation at the field office, including air traffic control systems, communication systems, radio systems, and information

processing systems. You will also see professional and safety-conscious training sessions conducted by instructors with extensive experience and knowledge in the field.

At the end of the tour, participants can freely explore Sendai Airport terminal, enjoy the view from the observation deck, and shop for local souvenirs.

Tentative Program

Time	Location & Details
13:30 ~ 14:30	Depart from Westin Hotel Sendai for the Aeronautical Safety College Iwanuma Training Center
14:30 ~ 14:45	Overview of the Iwanuma Training Center Q & A session
14:45 ~ 15:30	Tour of the training facilities
15:30 ~ 15:45	Depart from the Iwanuma Training Center for the Sendai International Airport
15:45 ~ 16:20	Explore the Sendai Airport Terminal ▪ Shopping ▪ Observation Deck "Smile Terrace" ▪ Explanation panel exhibition of the Great East Japan Earthquake etc.
16:20	Meet at the Center Plaza on the 1st floor in the Sendai Airport
16:30 ~ 17:30	Back to the Sendai Kokusai Hotel

Attire: Comfortable casual wear and shoes.

Details: Given the specialized nature of the facility and the precision of the equipment used, the numbers of participants allowed during the tour will be limited.

These measures are necessary to ensure both visitor safety and the proper functioning of the equipment.

We appreciate your understanding and cooperation in adhering to these restrictions.

Sendai Airport Course

In this course, participants will visit Sendai Airport and be introduced airport operations and air traffic control services.

You will also learn about Sendai Airport's recovery from the Great East Japan Earthquake in March 2011, and how it has progressed to its current state.

In the latter half of the tour, you can freely explore the terminal, enjoy the view from the observation deck, and shop for local souvenirs.
